

EurewaX

Next-Generation Payment Infrastructure

Making Global Cross-Border Payments Faster, Cheaper, and More Compliant

Agenda

This presentation covers four main chapters to provide a comprehensive overview of our group ecosystem and value proposition.

01

Who We Are

Three Entities · Group Licenses (Card Scheme Members) · Business Volume

02

What We Do

Product Architecture + Case Studies (B2B / Flight Tickets / OTA / FX Lock)

03

Backed By

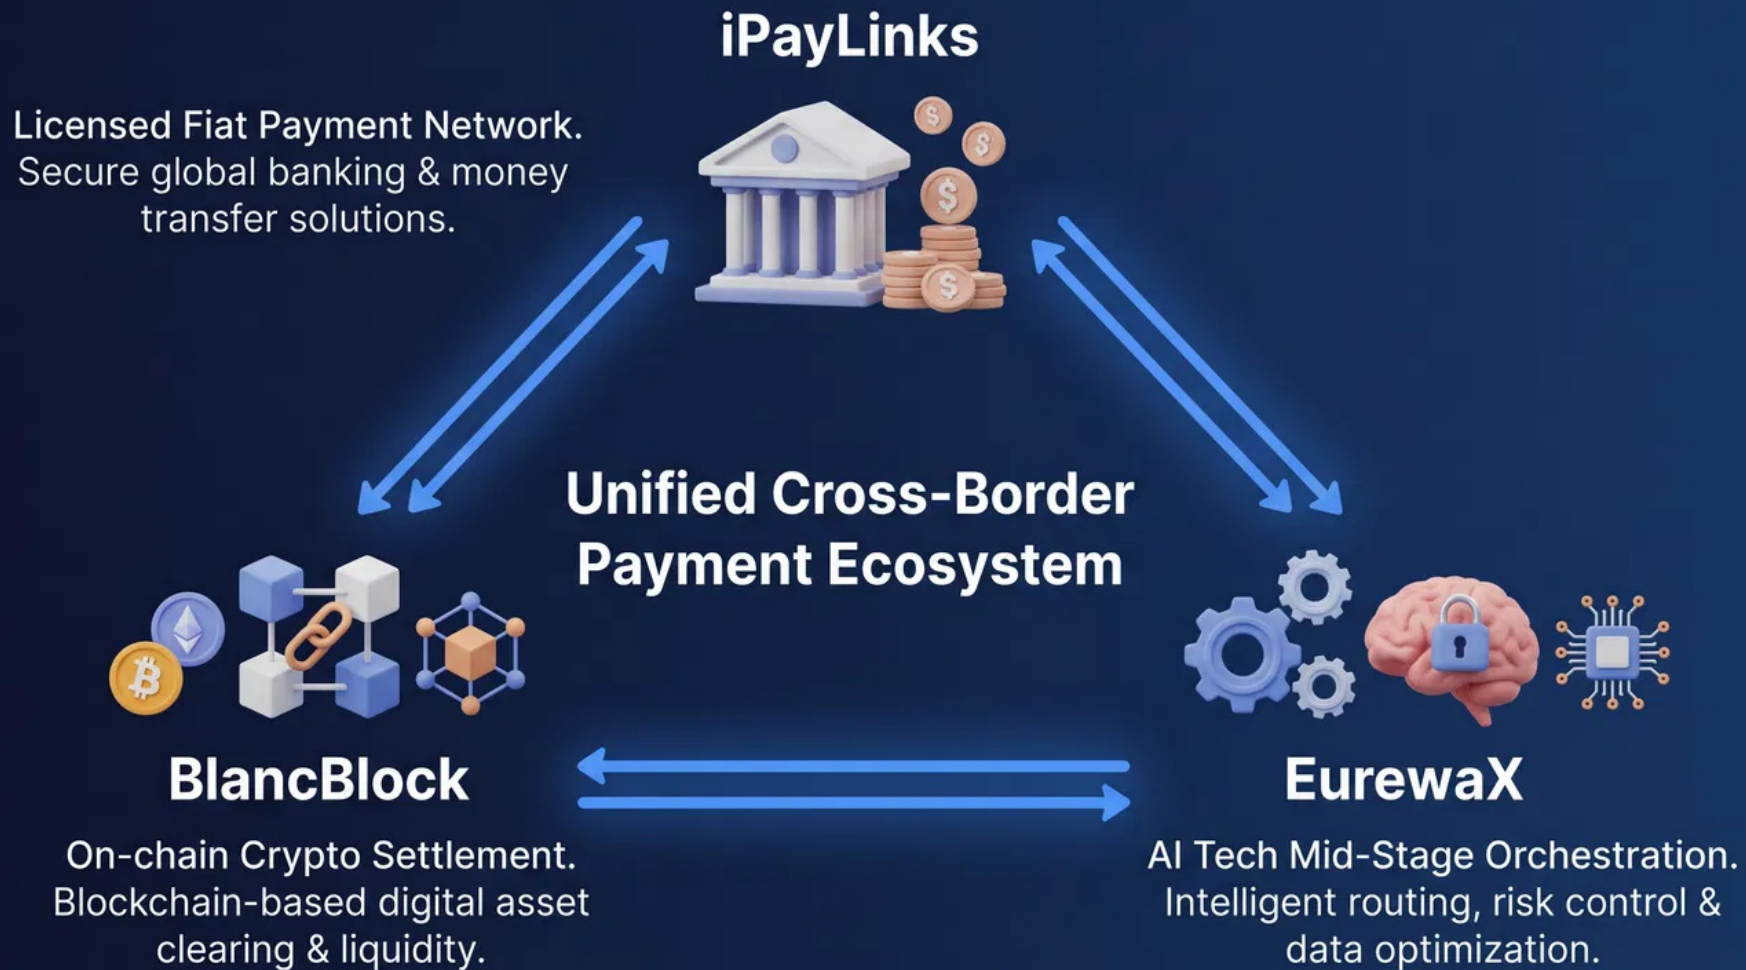

Tencent · Lenovo Capital · Sequoia Capital China

04

Q & A

What We Bring · Next Steps

Group Ecosystem

Scale at a Glance

Total Monthly TPV ~\$1.25B / Annual Processing Volume

\$10B+ Scale

Business Line	Customer Base	Active Customers	Avg. Monthly TPV
B2C Platform Settlement	100K+ Customers	20K+ Active	~\$200M / Month
B2B Trade Settlement	1,000+ Customers	500+ Active	~\$1B / Month
Acquiring	—	—	Peak Daily TPV >\$100M
OnRamp/OffRamp	200+ Customers	100+ Active	~\$50M / Month
Card Issuing	Mastercard Principal Member	Ramping Up	Thousands of Cards/Month

Deep Roots in B2B

B2B business started in 2020, one of the earliest cross-border B2B payment providers in China; Official Amazon PSP serving top global sellers.

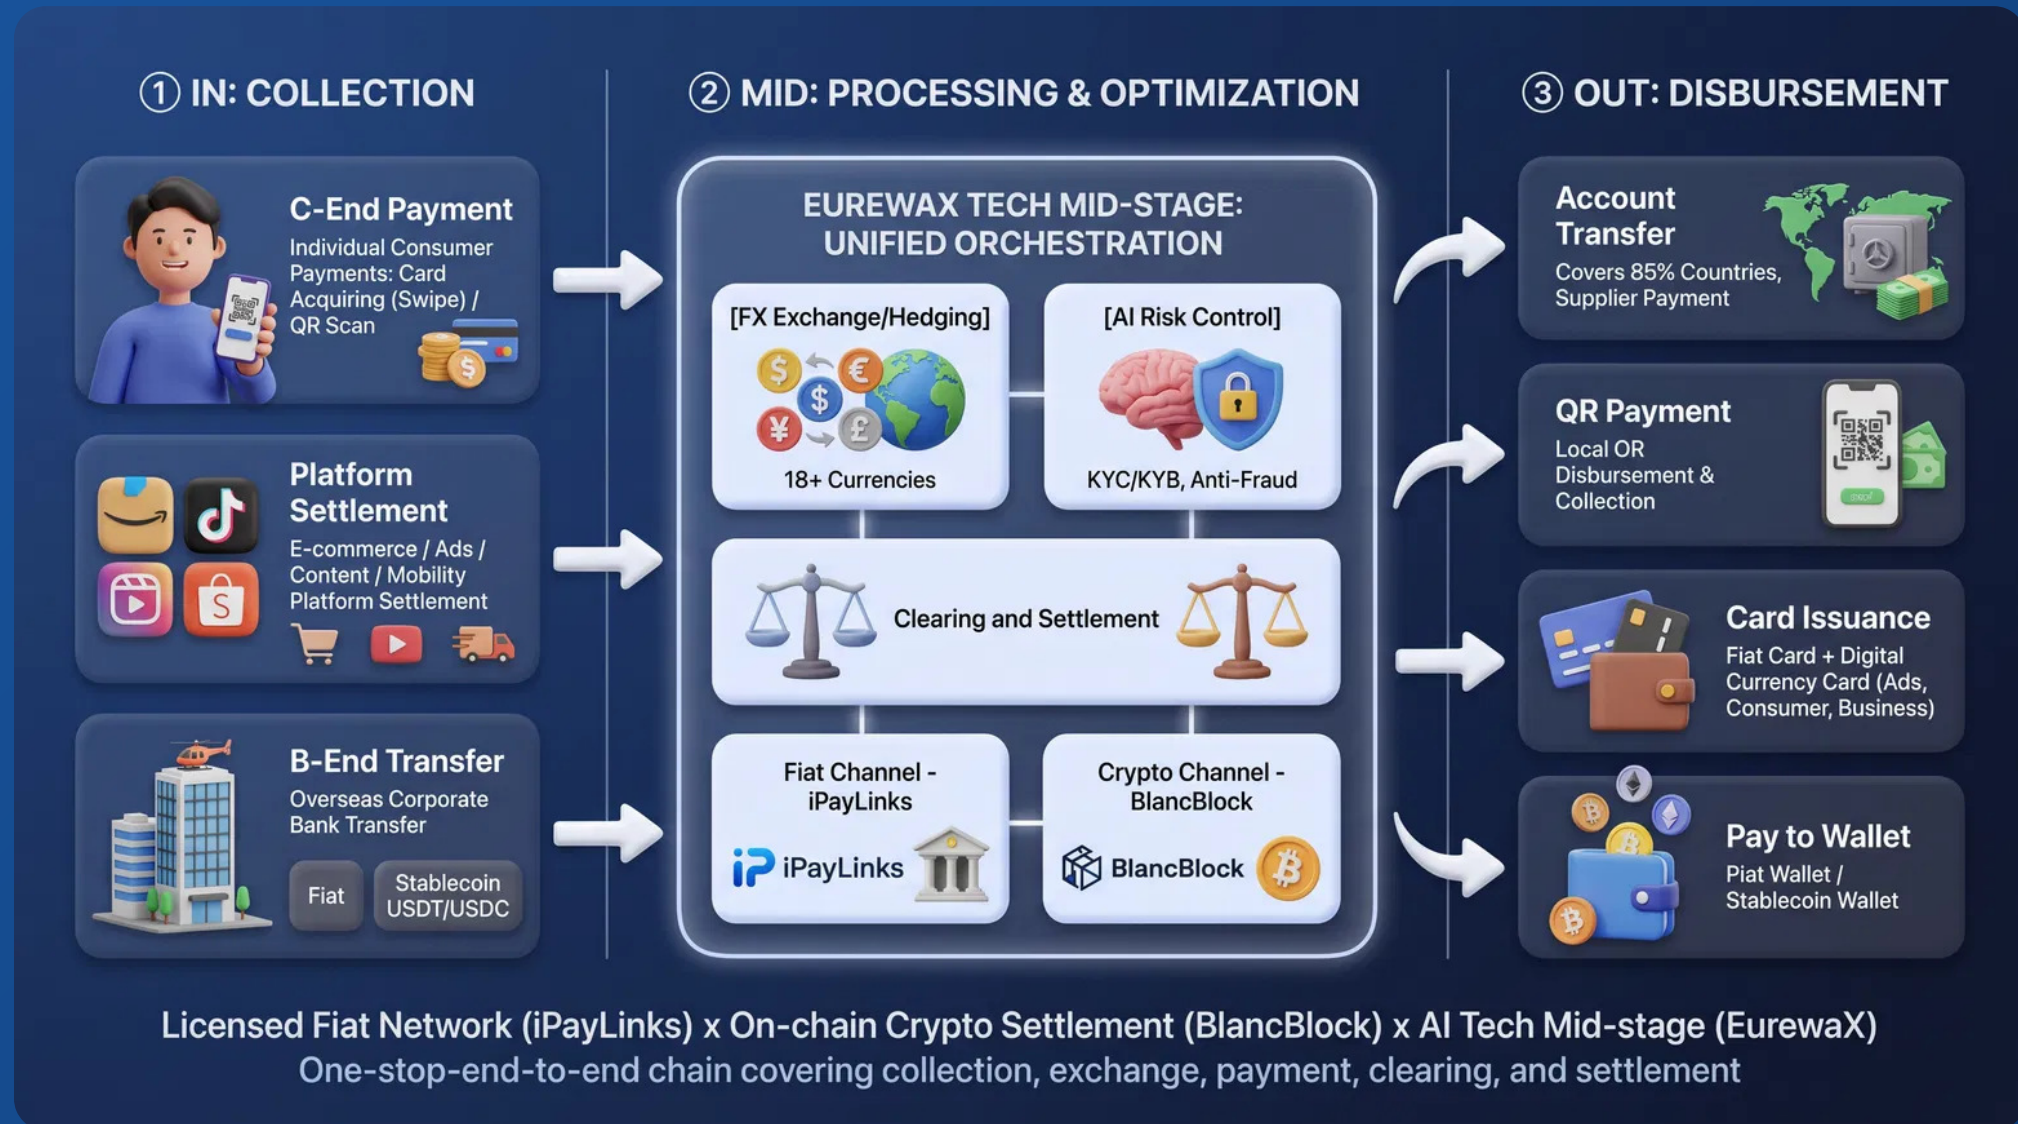

Significant Customer Value

Payment Cost Reduced by 80%+

Operational Efficiency Up by 60%+

Product Architecture Overview

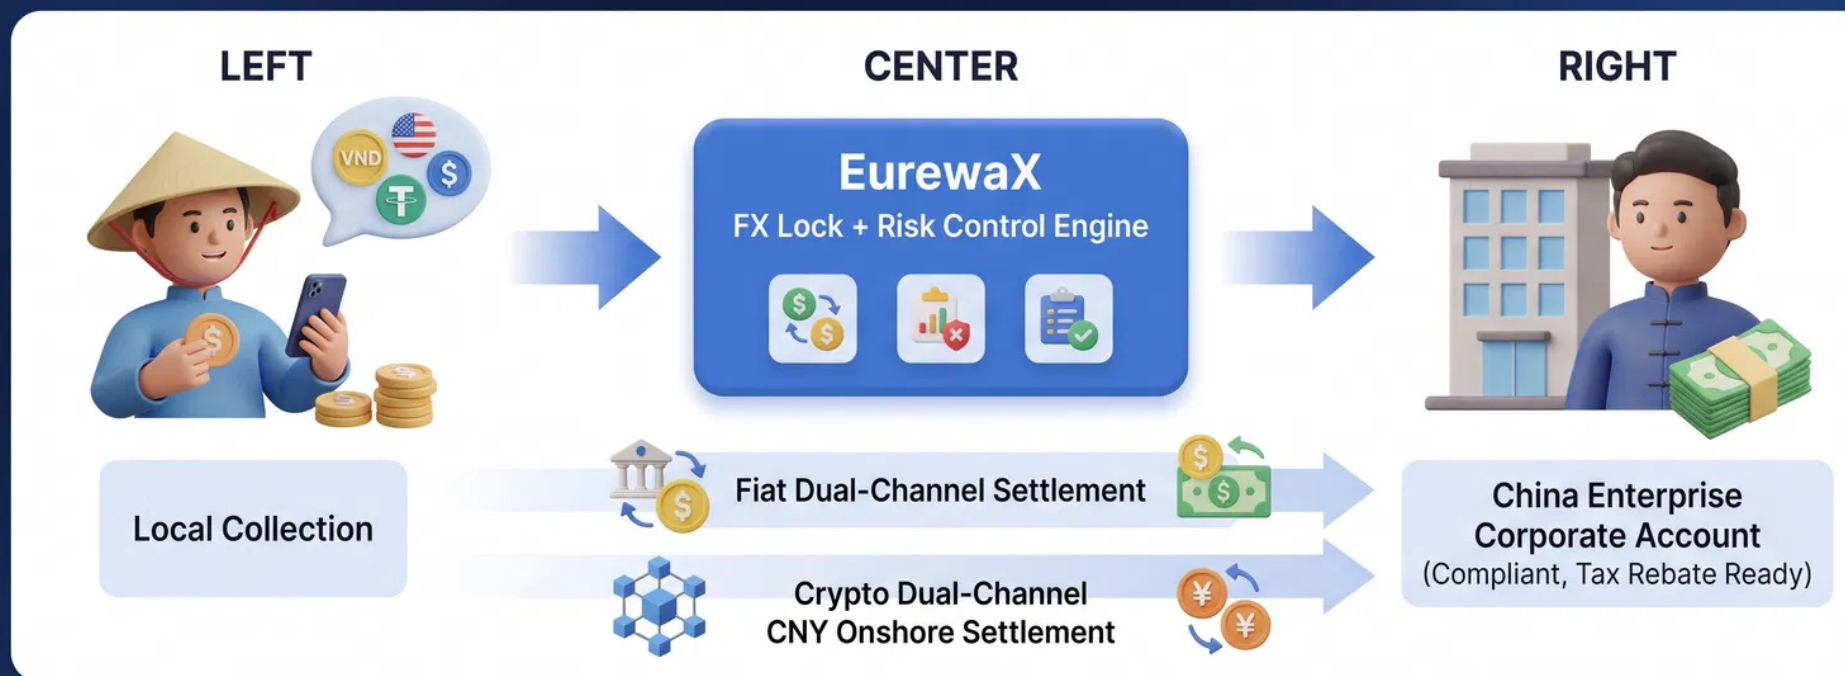

Full-lifecycle cross-border fund processing: Covering the entire chain of "Collection, Exchange, Management, and Disbursement".

Case 1: Cross-border B2B Trade

Solving the issues of USD shortage for Vietnam buyers and slow/expensive SWIFT transfers, achieving low-cost dual-channel settlement.

Case 1: Cross-border B2B (Vietnam Buyer)

Pain Points

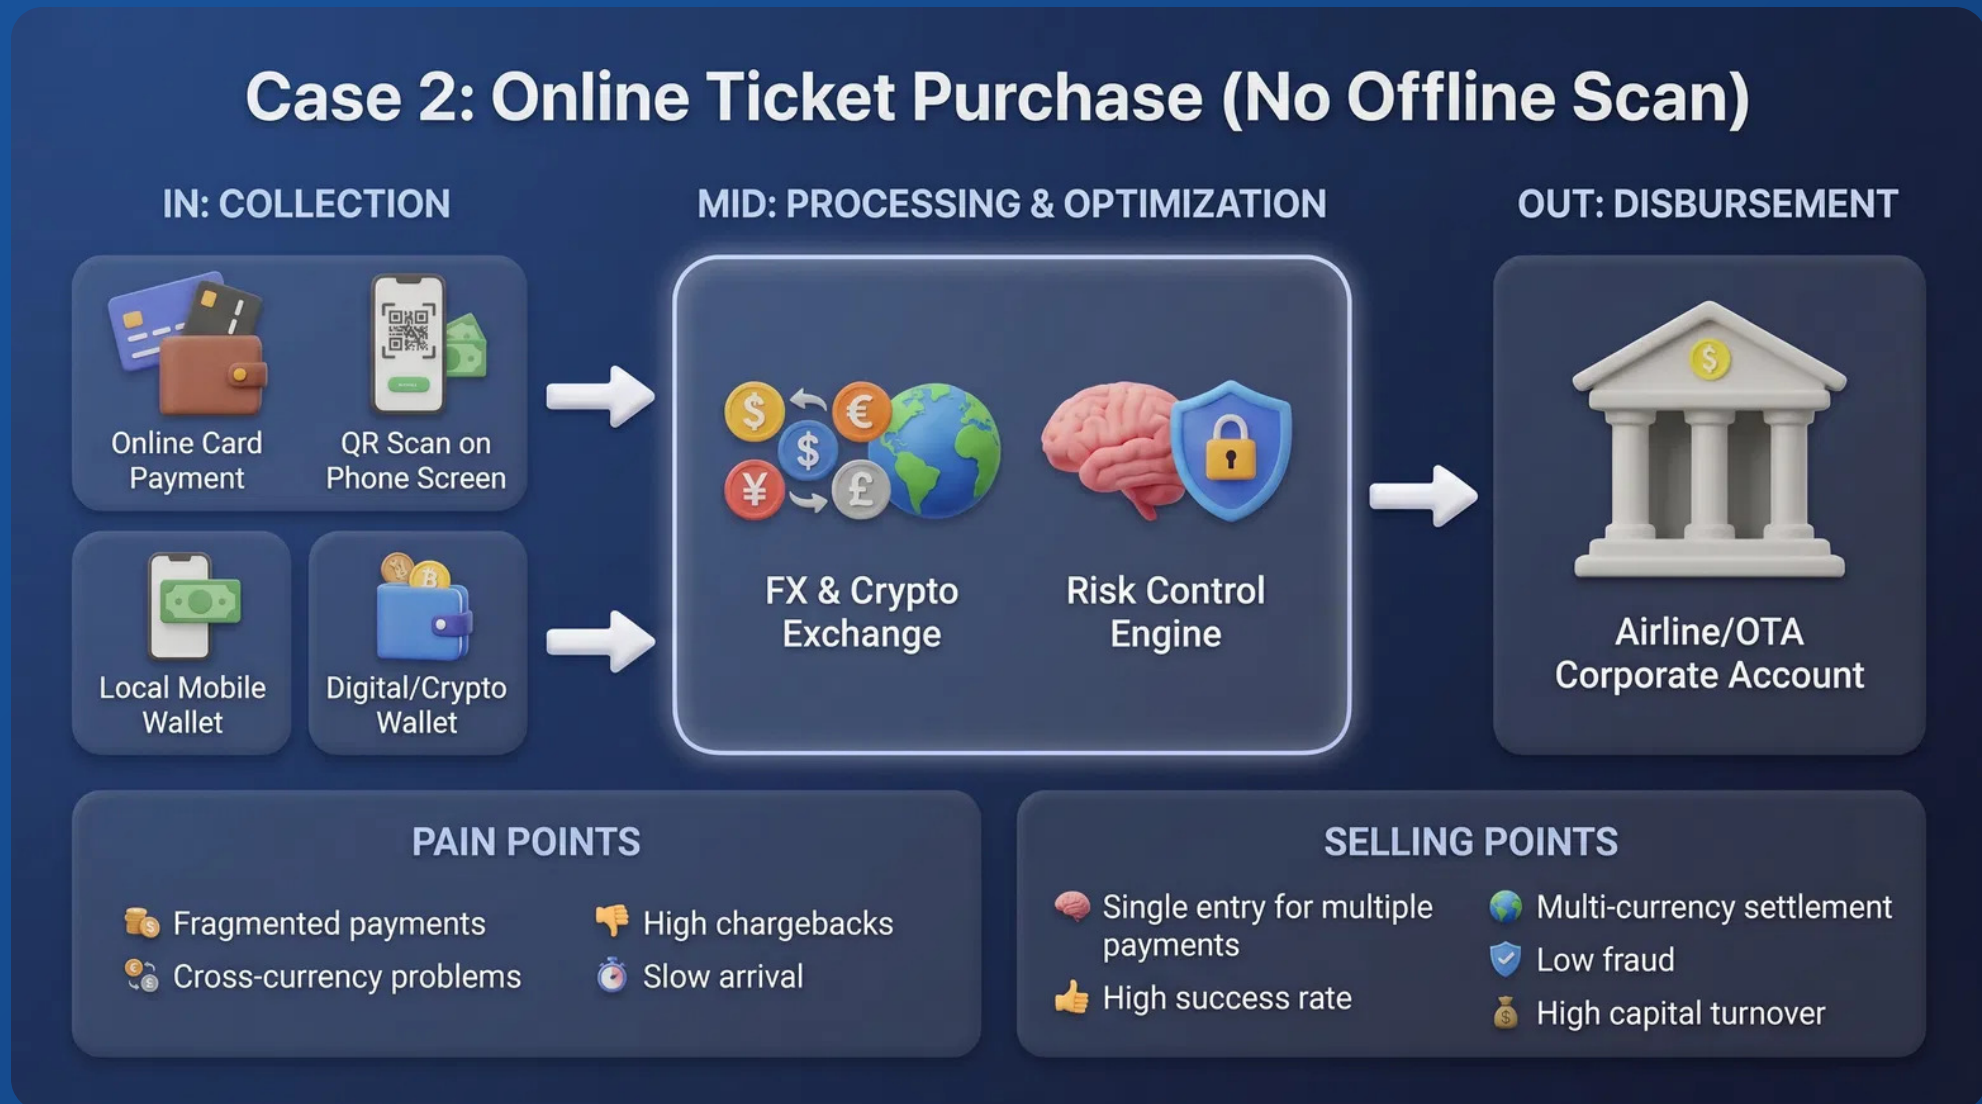

- ✗ USD Shortage
- ✗ SWIFT slow & expensive (3-5 days)
- ✗ Rate fluctuation
- ✗ Thin Margins

Key Selling Points

- ✓ Same-day/Next-day Arrival
- ✓ Lower Comprehensive Cost
- ✓ Automated PO Matching
- ✓ Full Traceability

Case 2: Online Ticket Purchase (Multi-method Acquiring)

Solving payment fragmentation and slow arrival issues, improving capital turnover for airlines and OTAs.

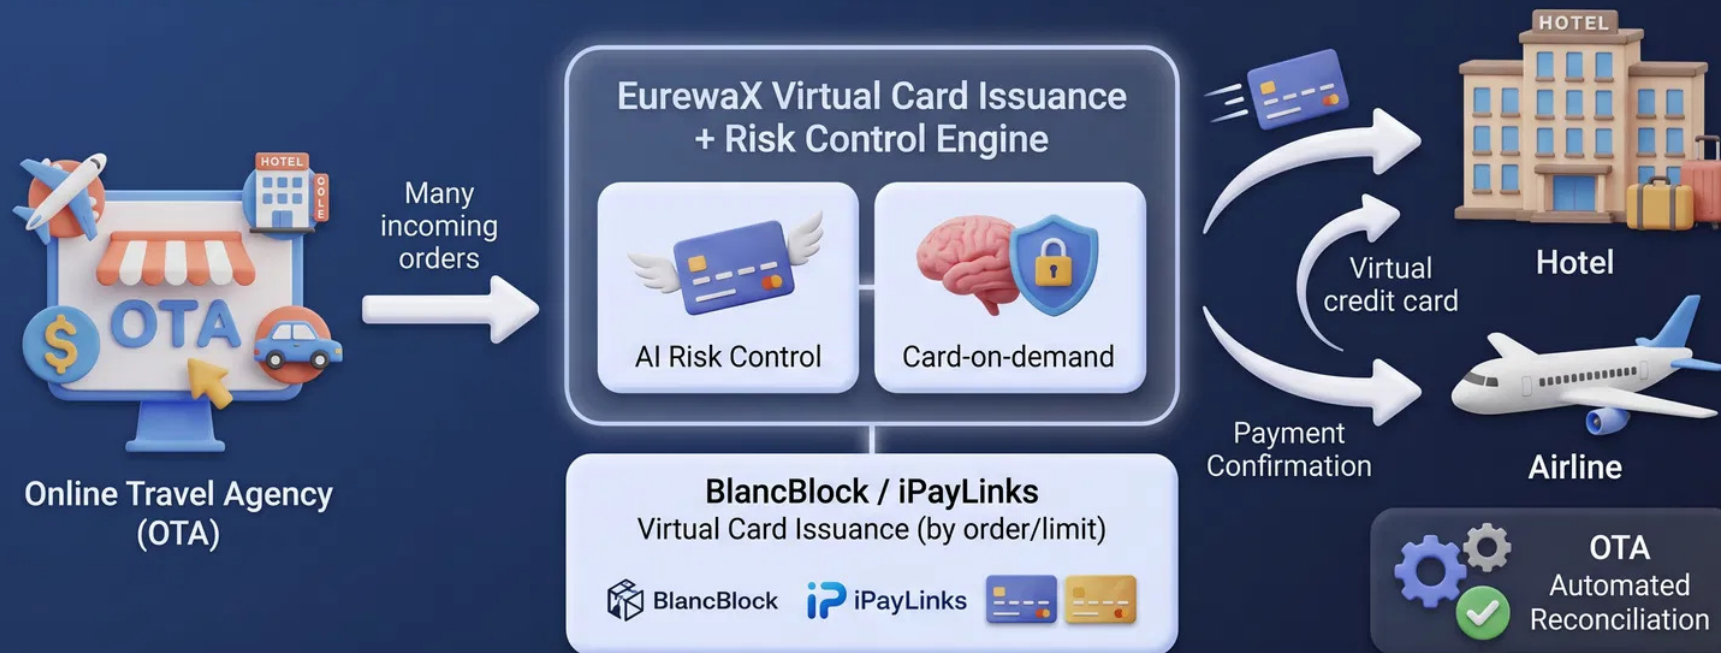

Case 3: OTA Payments to Airlines/Hotels (Card Issuing)

Solving issues with numerous suppliers, tedious batch payments, and reconciliation difficulties, achieving automated matching of fund and information flows.

Case 3: OTA Card Issuance (EurewaX added)

Workflow focused on OTA payments to suppliers

Pain Points:

Many suppliers, Batch payments tedious, Reconciliation tedious, Time-sensitive booking requires fast payment - card payment needed.

Selling Points:

Card-on-demand, Controllable limit, Automated Reconciliation.

Case 4: FX Lock Product (USD Quote vs CNY Cost)

Solving FX risk caused by currency mismatch between quotes and costs, locking in gross profit.

Case 4: Hedge Exchange Rate (Lock FX product)

Core Advantages

WHY US

End-to-End Coverage

In (C-end/Platform/B-end) →
FX+Settlement → Out
(Transfer/QR/Card/Wallet), realizing **one-stop** cross-border fund flows.

Fiat + Crypto Dual Channel

Flexible switching when fiat is
slow/expensive or USD is short. **T+0 low-cost settlement**, unconstrained by single
channels.

Licensed + Scheme Member

Compliance foundation + major card
scheme acquiring/issuing capabilities.
Recognized by highly regulated global
markets.

Tech Mid-Stage Orchestration

Unified orchestration of FX, risk control,
and open APIs. Enables **rapid replication**
in new markets.

1. End-to-End Coverage

In → FX + Settlement → Out,
one-stop cross-border fund flows

2. Fiat + Crypto Dual Channel

T+0 low-cost settlement,
flexible switching

3. Licensed + Scheme Member

Compliance foundation,
core barrier to entry

4. Tech Mid-Stage Orchestration

Rapid replication in new markets,
lower expansion costs

Top-Tier Investor Backing

STRATEGIC INVESTORS

Lenovo | Tencent | Vision Plus Capital

Legend Capital | Kairous | Phoenix

Value Proposition WHAT WE BRING

1. End-to-End Coverage

In → FX + Settlement → Out,
one-stop cross-border fund flows

2. Fiat + Crypto Dual Channel

T+0 low-cost settlement,
flexible switching

3. Licensed + Scheme Member

Compliance foundation,
core barrier to entry

4. Tech Mid-Stage Orchestration

Rapid replication in new markets,
lower expansion costs
